EDUCATION:

Binghamton University, State University of New York
BS Math | BS Economics — Expected Graduation: May 2027
Cumulative GPA 3.78/4.00 | Pi Mu Epsilon Math Honor Society | Hinman College Council | Dean's List (5 semesters)

WORK AND VOLUNTEER EXPERIENCE:

Jackson National Life — Lansing, MI
Actuarial / Asset and Liability Management Intern — May 2026 – August 2026

- Developed production Python models to project five years of crediting rates for Jackson annuity products, supporting quarterly rate-setting decisions
- Updated departmental MG-ALFA model to support launch of Jackson Market Link Pro 4 registered index-linked annuity (RILA) product line
- Incorporated new product offerings into SAS pipelines for in-force business processing and new business projections
- Built Excel and Python validation tools to catch input data discrepancies before ALFA model runs

United Way of Broome County — Vestal, NY
Tax Preparer — January 2024 – Present

- Prepared tax returns for 200+ low-income tax filers over three tax seasons
- Earned advanced certification from the IRS Volunteer Income Tax Assistance (VITA) program

Visions Center for Student-Athlete Excellence — Binghamton, NY
Tutor — August 2024 – May 2025

- Tutored several dozen student athletes in Statistics, Microeconomic Theory, and Macroeconomic Theory over two semesters
- Produced personalized study materials to aid in tutoring

PROJECTS:

Solow / Feldman-Mahalanobis Growth Model Simulators

- Built interactive JavaScript web apps to help explain and visualize projections of growth models

Bayesian Hierarchical Modeling of Bus Arrival Times

- Wrote Python script to collect two weeks of public location data for Binghamton University buses
- Processed 1.2 million data points into a record of arrival and departure times at 166 stops
- Fit Bayesian Hierarchical Model to each of 23 lines for use in estimating true mean arrival times

SKILLS:

Language: English, Mandarin Chinese (HSK Level 2)
Computer: Microsoft Office (Word, Excel, PowerPoint), Java, Python, R, Stata, SQL, MG-ALFA, SAS
